JOINT PRESS RELEASE I 2027 COOPERATION

Scandinavian Time Attack and TimeAttack.fi announce new cooperation for 2027

After two years of jointly promoting King of Finland, Scandinavian Time Attack and TimeAttack.fi are taking a major step forward with a new organisational structure, clearer responsibilities and a shared ambition to strengthen Time Attack motorsport in Finland and Sweden.

From 2027, King of Finland will become Time Attack Challenge Finland. TimeAttack.fi will take full responsibility for promoting, organising and developing Time Attack events in Finland, starting at Alastaro Circuit in May, with opportunities to expand to other circuits in the future.

Scandinavian Time Attack will step back from its previous role as co-promoter and instead support the Finnish organisation as its exclusive long term Official Rules & Classes Supplier.

Established rules and professional standards

For more than 14 years, Scandinavian Time Attack has developed and continuously refined its competition classes and technical regulations through extensive practical experience, technical scrutiny and feedback from competitors and officials.

Under the new arrangement, TimeAttack.fi will have exclusive permission to use Scandinavian Time Attack's established rules and class structure for Finnish Time Attack events throughout 2027, with the shared intention of continuing the cooperation in the years ahead.

Scandinavian Time Attack will also provide year-round technical guidance for Finnish drivers and organisers, helping competitors prepare their cars and compete under a consistent and professionally developed framework.

The organisations will explore further technical cooperation, including training and onboarding for Finnish technical inspection personnel.

Connecting Finland and Sweden

A central ambition of the cooperation is to make it easier and more attractive for drivers to compete in both countries.

The initial focus for 2027 will be two major events:

- **Time Attack Challenge Finland, 14-16 May 2027:** The main Finnish event, organised by TimeAttack.fi in cooperation with Alastaro Circuit.
- **King of Mantorp, 1–3 July 2027:** Scandinavian Time Attack's flagship event and one of the highlights of the Scandinavian Time Attack season.

With compatible technical regulations and closer coordination, drivers will have greater opportunities to experience different circuits, compete internationally and become part of a growing Time Attack community across both countries.

The organisations also see potential for future joint activities, exchange of knowledge and officials, and other initiatives that can further develop the sport.

Looking ahead

The new arrangement marks the successful conclusion of two years of joint promotion and the beginning of a more independent and sustainable structure for Finnish Time Attack.

Scandinavian Time Attack wishes TimeAttack.fi every success in leading the next stage of Finnish Time Attack and looks forward to contributing its established technical framework and expertise.

Both organisations share an optimistic outlook for 2027 and beyond, with the common goal of creating more opportunities for drivers, teams and enthusiasts in Finland and Sweden.
